Up to now we obtain just products guaranted by the supplier being manufacturing of non genetically modified organisms. We can confirm this fact on the basis of our purchase contracts and conditions therein given by us

All our suppliers are asked to provide evidence or to prove on the basis of dokuments and certifications from their suppliers, that delivered products contains no genetically manipulated ingredients except for accidental or technical inevitable contamination with genetically changed material till the threshold of 0,9% oriented on each ingredient.

Furthermore we let our suppliers confirm that delivered products aren't irradiates.

We want to annotate that these confirmations are only valid for the current season and are not to be considered as warrantee for the products delivered in future.

Each season we also have to inform ourselves if new genetically modified plants were allowed, if they are on the market and if our suppliers use these as ingredient or additiv for our products.

Although we estimate the sources claimed by us to be reliable, we can take over the completeness and accuracy of the information given here no liability - subject to change
